

Energy Committee

Vice Chair – Statement of Intent

Name of the Candidate: Aleksandra Petrović

Company of the Candidate: Schoenherr

My experience in supporting policymakers design RES legislation has shown me how regulatory framework can unlock investments and improve financing conditions, but also how policy directly shapes competitiveness of energy-intensive customers. As Vice Chairperson, my focus will be on addressing the main concerns of the industry: legal certainty, bankable commercial arrangements, protection against price volatility and securing long-term access to clean electricity at competitive prices. I will advocate for implementation of CBAM that levels the playing field without undue burdens, while supporting our members in finding the opportunities to optimize energy costs, ensure demand-side flexibility and participate as well as benefit from energy transition. In this role, I will ensure the Committee delivers pragmatic, business-orientated solutions that align sustainability with competitiveness.
