

Environmental Committee Chair - Agenda Proposal

Name of the Candidate: Gordana Vasojević

Company of the Candidate:

MTU Maintenance

The Environmental Committee will facilitate the exchange of information, experience, and expertise regarding the implementation of principles established in the Green Agenda. Furthermore, it will work on identifying challenges and solutions, as well as preparing various documents aimed at improving legislation.

The key activities planned for the future are: ESG reporting, renewable energy, Mobility, Energy Efficiency, Food and agriculture, Circular economy/recycling, and CBAM implementation. It is also proposed that meetings be held at member companies so that examples of best practice can more easily reach smaller enterprises—particularly those founded in Serbia that require assistance on their green transition journey.
