

Health Care Committee

Vice Chair – Statement of Intent

Name of the Candidate: Jelena Todorov
Company of the Candidate: Medtronic

My vision for the next two years is to make the Working Group a stronger platform for dialogue, practical solutions and measurable regulatory progress. Drawing on my experience in Regulatory Affairs, I would bring a business-minded yet constructive perspective, connecting companies' day-to-day realities with policymakers' and regulators' objectives.

My priorities would be to anticipate regulatory change through early engagement; turn members' experiences into clear, evidence-based recommendations; strengthen cooperation between AmCham members, regulators and relevant stakeholders; and promote smart regulation that is clear, predictable, proportionate and aligned with European standards and best practices. Above all, I would work to strengthen the collective member voice and ensure our positions translate into meaningful follow-up and tangible progress.
