

Environmental Committee Vice Chair – Statement of Intent

Name of the Candidate: Lidija Radulović
Company of the Candidate: CETIN

Dear AmCham members,

We are facing challenging times in which climate change affects our everyday lives more than ever, and we need an approach that goes “beyond business as usual”.

I believe these are the core focus areas the Committee should commit to in the next mandate:

- advancing a green transition for people and business,
- fact-driven, risk-benefit based regulation,
- protection of biodiversity and water resources,
- multi-sector cooperation for better implementation of sustainability standards,
- environmental protection through innovation.

Regulation is only part of the solution, we need to engage all stakeholders to make sustainability work. With 10+ years in environmental protection, energy and sustainability across the NGO, energy and technology sectors, I feel ready to contribute.
